## Summary

---

Proficient MERN Stack Developer with an excellent grasp of front-end technologies, demonstrated through hands-on internship experience building a complex ERP system. Proven ability to take initiative, developing a back-end API to meet project deadlines. Eager to apply full-stack proficiency, with a passion for creating intuitive user interfaces, to a challenging new role.

## Experience

---

**Front-end Developer Intern**, SPH Aviation – Gurugram June 11, 2025 - Present

- Developed and maintained responsive UI components for a complex, role-based Enterprise Resource Planning (ERP) system using React.js.
- Collaborated daily with the back-end team to integrate RESTful APIs, ensuring seamless data flow and functionality for user-specific dashboards.
- Proactively resolved a development bottleneck by independently designing and building a required RESTful API endpoint using Node.js and Express.js, ensuring a critical form feature was delivered on schedule.
- Actively participated in agile sprints and team code reviews to improve application performance and maintain a high-quality codebase.

## Skills

---

**MERN Stack:** MongoDB, Express.js, React.js, Node.js

**Front-End Technologies:** JavaScript (ES6+), HTML5, CSS3, Next.js, Tailwind CSS

**Developer Tools & Concepts:** Git, GitHub, RESTful APIs, Agile Methodologies

**Familiar With:** Computer Networks, SQL, C/C++, OOPS

## Education

---

**Chandigarh University**, Mohali – Bachelor of Engineering in CSE Jul 2020 – May 2024

**Tribhuvan Devi Academy**, Sultanpur – Intermediate April 2019 – April 2020

**Tribhuvan Devi Academy**, Sultanpur – Matriculation April 2017 – April 2018

## Projects

---

**Patient Management System** [github.com/careplus](https://github.com/careplus)

- Built a full-stack application with a secure backend for authentication and storage, and integrated third-party APIs for communication and error monitoring.
- Technologies: Next.js, Tailwind CSS, Appwrite, Twilio & Sentry Integration

**Apple iPhone 15 Pro UI/UX Website** [github.com/apple\\_website](https://github.com/apple_website)

- Created an immersive and interactive user interface with complex animations and 3D models to showcase a flagship product.
- Technologies: React.js, Three.js, GSAP, TailwindCSS

## Certificates

---

**Full Stack Web Development** - Internshala Jun 2022 – Sept 2022

**Software Testing**, – NPTEL Sept 2022 – Jan 2023

**Git Essential Training**, – LinkedIn Learning May 2025
