PERSONAL PROJECTS

Apple iPhone 15 Pro UI/UX Website: React.js, Three.js, GSAP, TailwindCSS

- Creating an immersive user interface website for the Apple iPhone 15 Pro utilizing React.js, Three.js, GSAP, and TailwindCSS.
- Implementing cutting-edge technologies to deliver captivating visual experiences and seamless interactions.
- Crafting intuitive and user-friendly interfaces that showcase the features and capabilities of the iPhone 15 Pro.

Music School Website: Next.js, TailwindCSS, & Aceternity UI

- Building a modern and responsive user interface for a music school website using Next.js.
- Implementing sleek and customizable designs with TailwindCSS to enhance user experience.
- Leveraging the power of Aceternity UI for intuitive and visually appealing elements tailored for the music education industry.

Nike Website - UI/UX Development using React.js & TailwindCSS

- Designed and developed the user interface for Nike's website utilizing React.js and TailwindCSS.
- Implemented responsive and visually captivating designs to elevate user experience.
- Collaborated cross-functionally to ensure the creation of intuitive interfaces that resonate with Nike's brand identity and meet customer expectations.

Live Attendance using face recognition

- Face recognition for contactless attendance marking.
- Automatic time collection for accurate record-keeping.
- Enhances safety and minimizes physical contact.
- Developed a cutting-edge face recognition system for seamless and contactless attendance tracking, ensuring efficiency and accuracy.
