Summary

Full Stack Developer with 1.2 years of production experience building AI-powered platforms, ERP systems, and enterprise workflow applications using React.js, Node.js, MongoDB, Redis, BullMQ, Socket.IO, AWS, and Anthropic Claude API, with expertise in scalable REST APIs and cloud deployment.

Professional Experience

Full Stack Developer

Startup Stairs (AVPL International), Gurugram

Sept 2025 – Present

- Built and delivered production-grade full-stack applications from scratch across ERP systems, AI-powered platforms, enterprise workflow solutions, and service marketplaces.
- Developed 50+ REST APIs using Node.js and Express.js, implementing JWT authentication, role-based access control (RBAC), and workflow automation.
- Built an AI-powered startup evaluation platform from scratch using React.js, Node.js, MongoDB, Redis, and BullMQ, integrating the Anthropic Claude API to generate detailed reports across 25+ business evaluation parameters.
- Implemented asynchronous job processing using Redis and BullMQ to execute AI-powered report generation reliably by queueing long-running tasks and preventing request timeouts during concurrent usage.
- Implemented real-time notifications using Socket.IO and automated email workflows using Nodemailer for OTP verification, password recovery, report delivery, and workflow notifications.
- Built a geo-tagged attendance system with real-time photo capture, supporting 150+ daily active users across multiple operational locations.
- Optimized API performance by approximately 30% using MongoDB indexing and query optimization; deployed production applications on AWS (EC2, S3, CloudFront).

Frontend Developer Intern

SPH Aviation (now IQuantra) – (AVPL INTERNATIONAL) – Gurugram

Jun 2025 – Sept 2025

- Developed responsive ERP modules using React.js, integrated REST APIs, and built reusable UI components.
- Independently developed a Node.js + Express.js API to resolve a critical delivery blocker.

Production Projects

AI Startup Pitch Analyzer (React.js, Node.js, MongoDB, Redis, BullMQ, Anthropic Claude API, AWS)

- Built an AI-powered startup evaluation platform that analyzes PDF/DOCX pitch decks and generates reports across 25+ business evaluation parameters.
- Implemented asynchronous AI processing using Redis and BullMQ with real-time progress tracking and downloadable PDF reports.

MOU Management Dashboard (React.js, Node.js, Express.js, MongoDB, Socket.IO, Nodemailer)

- Built an enterprise MOU dashboard with RBAC, document workflows, real-time notifications (Socket.IO), and automated email workflows (Nodemailer).

ERP System — Workforce Management

- Developed ERP attendance and workflow modules including geo-tagged attendance with real-time photo capture supporting 150+ daily users.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit (RTK Query)

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.IO, Nodemailer

Database & Queue: MongoDB, Redis, BullMQ, MySQL

Cloud & AI: AWS (EC2, S3, CloudFront), Anthropic Claude API

Education

B.E. in Computer Science Engineering

Chandigarh University — 2024
